Dear Philipp:

Based on advice of referees and my own reading of your submission, MS 10693, entitled

"The Approximate Solution of Finite-Horizon Discrete Choice Dynamic Programming Models: Revisiting Keane & Wolpin (1994)"

I have decided to give you an opportunity to undertake revisions for possible publication of this paper in Journal of Applied Econometrics.

I attach a copy of my decision letter and referee reports below.

I must stress that while I am offering you an opportunity to revise and resubmit this paper, I am not able to provide any guarantees that I will be able to publish it should you decide to take up my offer and resubmit a revision that deals with the comments in the attached decision letter and referee reports.

Please feel free to contact me if you have any questions about my decision, or if you have difficulty reading any of the attachments.

Thank you for giving us the opportunity to consider your work.

Sincerely,

Badi Baltagi
